Knowledge Formula:

$$\text{Knowledge} = \text{Integrity} \times \text{Resonance}^2$$

SRS Formula:

$$SRS = \alpha \bar{I} - \beta \sigma(I) - \gamma c + \delta rq + \epsilon apq$$

Where:

- $\alpha, \beta, \gamma, \delta, \epsilon$ = weighting coefficients
- $\bar{I}$ = mean integrity
- $\sigma(I)$ = integrity variance
- c = computational cost

Thermodynamic Relationship:

$$10\% \uparrow SRS \approx 6\% \downarrow \text{Energy Usage}$$

→ Higher ethical coherence reduces computational cost
